Top-quality optic system:

- Adopt high transmittance optic lenses, 30% higher than the ones in universal quality slit lamp.
- All the optic lenses are processed with damp proofing and anti-mist coating
- The high transmittance optical design eliminates clutter light and increases the image sharpness by 50% higher than that of ordinary slit lamp
- Corneal endothelial cells can be observed under 40X magnification
- It's much more comfortable for doctor to use it
- **Micro Platform:**
- It is the most smooth mechanical platform. A slight strength on two fingers can turn the joystick to control the platform up or down.
- Arbitrary fine-turning, positioning in most precise way.
- Stepless brightness control knob above the joystick allows easier operation with one hand

SL-500E is same quality as CSO SL-9900

CRO-1 Confocal Retina Ophthalmoscope

Min Quantity(EA)

Wholesale Price(USD)

The MICRO-CLEAR[®] CRO adopted advanced laser scanning tech can be conducted with either fluorescein or ICG dye; both modes produce detailed, high-resolution images and video sequences that show vessel filling, flow, and leakage. For enhanced practice flow and diagnostic precision FA and ICGA can be acquired simultaneously and in combination with OCT imaging. The MICRO-CLEAR[®] Confocal laser Scanning Retina Ophthalmoscope can often be performed with less dye than traditional fundus cameras reducing the risk of allergic reactions and patient discomfort

- World leading initiative confocal laser scanning technology
- Present high defintion and dynamic fundus angiography
- Long up to 30 seconds video
- Clear imaging suitable for senile patient and light cataract patient
- Five imaging mode: FFA/ICGA/IR/RF/AF
- Professional software analysis system
